

UC/TCH Family Medicine Brief Plan of Care Note

This patient is being admitted to the Family Medicine Service. I have seen and evaluated this patient. I have briefly discussed the care plan with the ED physician, the nurse, the patient and those present at the bedside. Appropriate orders were placed and the patient is aware that another team member will return for a full H&P later today.

[Document further if: critical lab value or vital sign (K>6, O2 req >4L or rising since ED admit), issue you would have been called about by an RN on a floor patient to come evaluate (worsening dyspnea, change in mental status, etc):

Briefly the patient was admitted for ***.

Plan: Include most important orders]

Please call 585-0883 for any urgent questions.
